

This unit offers fast and simple colour solutions for items like coffee.

It serves as an affordable option compared to other products available, ensuring decent quality.

# Senware ICM 1

## Specifications:

This device has the capacity to hold up to 5000 data points.

Data can be retrieved via a USB stick.

The unit can connect to a PC using either Ethernet (LAN) or a serial USB connection.

This is the primary interface of the unit, functioning with a designated coffee colour scale. It presents information like the temperature, date, and time, as well as the number of data points currently stored.

# Senware ICM 1

The main interface is both versatile and user-friendly. It allows for multiple calibration methods and can store information for up to 50 products, providing a variety of testing options.
